

# GOLDEN RULES SAFETY AT WORK

## TRAFFIC

Observe traffic rules inside and outside of the plants.

## BODY / POSTURE / TOOLS

Adjust posture to optimize the usage of tools/equipment.

## PROTECTIVE EQUIPMENT

Follow the manufacturer's instructions and maintain the equipment in good condition for individual and collective protection.

## WORKING ON POWERED SYSTEMS

Follow the rules to block incoming products or generation of energy during operations

## LIFTING

Observe safety precautions when operating lifting equipment that is maintained, checked and in good condition.

## WORKING AT HEIGHT

Use scaffolding with body rails or stationary or mobile platforms designed for the tasks to be performed and be equipped with appropriate harness-type protection.

## CONFINED SPACES

Check the atmosphere before entering a confined space. Provide an emergency response plan.

## HIGH-RISK SITUATIONS

Increase vigilance during high risk situations or unusual or complex operations.

## SIMULTANEOUS OPERATIONS OR CO-ACTIVITIES

Strengthen the coordination between teams during simultaneous operations and operations requiring co-activity.

## FORKLIFT AND STORAGE AT HEIGHT

Respect forklift driving rules and keep storage racks secured.
